

Please do not implement any proposal that would lessen Indiana's Telephone Privacy law protections. I have gotten a total relief from this law. I receive NO telemarketing calls and very much appreciate that. It has lessened the stress and time I used to spend on the phone trying to get rid of them. They would also call all hours of the day, NO TIME WAS SACRED to them. I very much would dislike it if you changed the law we have in Indiana. Please don't change what is already working for us.
